

MDC-P36S + MDCH-P36S*Compact cameras in a mini dome housing*

- Colour camera in a mini dome housing
- Lens with 3.6 mm fixed focal length
- Sensitive 1/3" CCD
- Easy installation on ceilings

SMALL AND ELEGANT

The MDC-P36S is a compact dome camera with an integrated fixed lens. The focal length of 3.6 mm and more than 330 TV lines always guarantee a good overview. Thanks to the high min. illumination of the high-quality 1/3" CCD (SONY), you still obtain a good image even in low-light conditions. The established MD series has therefore gained a new member. This series can be used for a variety of applications and can be integrated into virtually any environment for discreet surveillance, not least due to its small size.

HIGH RESOLUTION

The high-resolution version MDCH-P36S excels with 480 lines and is, for example, ideally suited for use in the retail trade to detect more details.

Model	MDC-P36S	MDCH-P36S
TV System	PAL	PAL
Focal Length	3.6 mm	3.6 mm
Image Sensor	1/3"-CCD	1/3"-CCD
