Envisioning Your Security. Providing Optimal Solutions.

JVC's commitment to your security is crystal clear. That is why we provide a broad lineup of cameras offering high-quality images, high-reliability performance, easy installation and worry-free handling. Regardless of the environment where you put them to work, whether indoors or outdoors, there is a JVC HD Network Camera aimed at satisfying your needs and exceeding your expectations. See how they work for you.

JVC Quality: Clear Images with Precise Color All the Time

Super LoLux HD™ “COLOR IN VIRTUAL ZERO LUX”

JVC original technology enables superior color reproduction even in dim environments (0.15lx at color mode). Precise surveillance with color images is assured even during high resolution monitoring.

Normal camera

JVC Super LoLux HD™

3D Noise Reduction (3DNR)

3DNR is a powerful method of improving image quality even for images shot in the dark. Noise data is detected by comparing consecutive frames and reduced by blending it into other frames over time.

Competitor's

JVC 3DNR

Full HD Monitoring and Auto Patrol Function

Monitoring with high resolution 1920x1080 Full HD images. Since high resolution is achieved, you can cover a larger area with a smaller number of cameras. “Auto Patrol” is made possible with the Digital PTZ function. Select up to 20 areas as “Preset positions” to be clipped from within the original angle and distributed sequentially.

- VGA/4CIF/PAL
- Quad VGA
- Full HD

H.264 High Profile Saves Bandwidth with High Efficiency

JVC H.264 High Profile offers even higher compression efficiency, reducing data bulk to an estimated 30% lower than normal H.264 Baseline Profile or H.264 Main Profile while maintaining precise image quality. H.264 High Profile, a truly intelligent method of image compression, can apply a lower compression rate to fine areas while applying very high compression to flat areas to save bandwidth depending on the image condition. By comparison, normal Baseline/Main profile applies the same compression rate to all areas. This difference directly affects image quality and bandwidth efficiency.

Baseline/Main Profile:
Same compression rate by 4x4 pixel blocks

H.264 High Profile:
Intelligent compression with variable compression rate depending on image condition of each 4x4/8x8/16x16 pixel block

Dual/Triple Stream for Zero-Latency Switching

The camera is capable of outputting not just one, but actually two or even three video streams simultaneously. Simply switch channels to select a different stream with no noticeable time lag, such as when switching from normal bandwidth-saving VGA stream to a Full HD stream when an alarm is tripped or suspicious activity is detected. This enables observation of critical scenes with higher resolution and clearer details.

C.L.V.I. (Clear Logic Video Intelligence)

High performance image processing technology offers superior wide dynamic performance and anti-fog capability. It assures clear pictures by effectively compensating for strong backlighting such as car headlights or digitally removing ambient fog, haze, or smoke by intelligent image correction process electrically. Edge enhanced images contribute to more precise recognition of monitoring objects.

C.L.V.I.

JVC Simplicity: Easy to Install and Use Right Away

Designed for Easy Installation

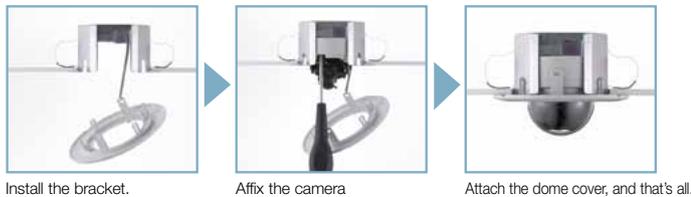

• Flexible Outdoor Installation (VN-H157WPU)

VN-H157WPU is a housing-integrated model for outdoor use. It installs easily onto ceilings and walls. Its angle can be adjusted over a wide range. The sunshade position is adjustable, and it utilizes a non-reflective material to contribute to an ideal observation environment.

• Ceiling Recessed Installation (Mini-Dome Series)

With optional ceiling bracket WB-S2205, Mini-Dome Series is designed to be flush mountable so you can easily recess it into the ceiling.

Powerful Focus Assist Technologies

• Fine Focus Adjustment Mechanism (Lens integrated models)

Extremely sensitive HD camera focus adjustment is facilitated with the use of an exclusive gear.

• Auto/Remote Focus Adjustment (VN-H57/H157/H257 Series)

Focusing can be a headache with HD cameras, but with JVC the Auto Focus function makes it easy and efficient. Even after installation, focus settings can be adjusted remotely from the set-up page. Remote adjustment of back focus is also possible with VN-H57U.

Monitor Output for Quick Angle Adjustment

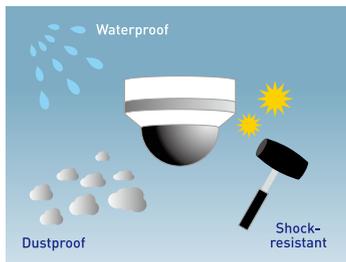

A convenient Monitor Output is equipped. With an external monitor unit connected, you can easily check the camera angle on the spot during installation.

JVC Reliability: Built Tough for a Long Service Life

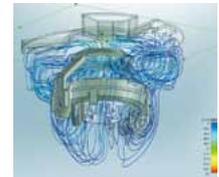

JVC Quality Vandal Protection

JVC dome cameras provide superior protection against vandalism. The Indoor Mini Dome offers IK10 level Vandal Resistance. Moreover, the camera is safeguarded by a protective cushion mechanism that absorbs shocks from the outside. The Outdoor/Vandal Proof model goes even further with 50J high impact resistance by virtue of its sturdy polycarbonate dome cover and aluminum die-cast camera body. It's the best choice for traffic, logistics and railways which require superior vandal-proof performance and water/dust protection.

Super Long-Life Design with Thorough Temperature Simulation

Heat accumulation has a major impact on the lifespan of a camera. JVC's know-how in heat dissipation design allows our cameras to deliver long quality and long life. The expertise we've gained in the analog camera field gives our cameras industry-leading service life. The same holds true for our HD cameras.

Various Alarm Functions

Incorporating various alarm functions including external alarm, tampering alarm, audio detection and motion detection, integrated operation with recording systems is possible. Suspicious activity will not go undetected.

Local Recording on SD Card

It is possible to record onto SD Card, including regular recording, Pre/Post Alarm recording, and more. Files recorded on SD Card can be downloaded and used on a PC.

Super LoLux HD™ Series Meets Three Global Standards of Security Cameras

1. Eco-Friendly Super Low Power Consumption

JVC Super LoLux HD™ Series saves 20% more energy than various competitors' models.

JVC VN-H37/H237 Series
120mA / 5.8W

Brand A	Brand B	Brand C
143mA / 6.8W	145mA / 7.0W	158mA / 7.6W

2. ONVIF/PSIA Support

Supports ONVIF and PSIA – world standard protocols for network cameras. It expands the possibility for various system integration.

3. Various VMS Support

Partnership with various VMS companies including Milestone for systems flexibility and upgradability.

Multi-Codec Network Video Recorder VR-X1600U/X3200U

• Viewer

- Supports H.264 High Profile/Motion JPEG/MPEG-4 camera recording
- 2800 ips powerful recording maximum (H.264 VGA)
- Full HD 1920x1080 output for precise monitoring
- Pre-installed Milestone Xprotect Enterprise software for user-friendly interface and easy operation
- Master/Slave configuration for large system without any additional license or server PC
- VR-X3200U: Up to 32-ch recorder fully camera licensed, optional license up to 32 channels additionally
- VR-X1600U: Up to 16-ch recorder fully camera licensed, optional license up to 16 channels additionally
- Optional camera license JVCNVRCL available by one channel
- Built-in 1TB HDD with 3 additional expansion slot (optional bracket VR-HDD0U required)

- Available NAS archiving, Data export function
- Supports RAID 1, 5, 10 initially and RAID 6 optionally
