

USB Professional Joystick Keyboard

Description

The Avigilon USB Professional Joystick Keyboard was designed to combine high performance and ease while monitoring video in the Avigilon Control Center Client software.

The keyboard is preconfigured with Avigilon Control Center Client software commands. You can quickly manage image panels, control views, use PTZ cameras and control the timeline for efficient review of recorded video within the software. The joystick controls camera PTZ, while the jog shuttle controls the speed of playback on the timeline.

For ease of use, the keyboard is powered via USB, and can be configured for both right-hand and left-hand use.

Features

- USB powered
- Preconfigured with Avigilon Control Center Client software commands
- · Can be configured for right-hand or left-hand use
