

# Zoom X4 5551A Modem Port Açma Ayarları

Zoom X4 5551A Modemlerde Port açmak için;

İnternet Explorer adres satırına **http://10.0.0.2** yazarak enter butonuna basınız

Karşınıza şifre ekranı gelecektir ve bu ekranda **Kullanıcı Adı : admin** ve **Şifre** bölümüne **zoomadsl** yazarak **OK** butonuna basınız.

www.rimaelektronik.com

Karşınıza aşağıdaki **Basic Setup** Menüsü çıkacaktır. Bu menüden **Advanced Setup** ardından **NAT** bölümünü seçiniz.

Karşınıza **Network Address Translation (NAT) Rule Configuration** Menüsü çıkacaktır. Burda en son girilmiş **Rule ID** değerine bakın. Bu örnekte son girilen **Rule ID** değeri 5, sizde farklı olabilir bu değeri aklınızda tutun. Sonra **NAT Option** 'dan **NAT Rule Entry** 'i seçip **Add** butonuna basın.

**Advanced Setup**  
The Advanced Setup section includes a number of options for specialized or advanced settings. These options should be configured by users with knowledge of DSL and networking settings or under the direction of a technical support representative.  
Any changes made will not be permanent until you have committed the changes using the **Write Settings to Flash** button at the bottom of any configuration page.  
More detailed information for each page is available by clicking the Help icon.

### Network Address Translation (NAT) Rule Configuration

NAT Options: **NAT Rule Entry**

Rule ID	IF Name	Rule Flavor	Protocol	Local IP From	Local IP To	Action
1	ALL	NAPT	ANY	0.0.0.0	255.255.255.255	Stats
2	ALL	RDR	TCP	10.0.0.254	10.0.0.254	Stats
3	ALL	RDR	TCP	10.0.0.254	10.0.0.254	Stats
4	ALL	RDR	TCP	10.0.0.254	10.0.0.254	Stats
5	ppp-0	RDR	TCP	10.0.0.4	10.0.0.4	Stats

**Add**

**Write Settings to Flash**

Karşınıza aşağıdaki **NAT Rule - Add** Menüsü çıkacaktır. **Rule ID** bölümüne üsteki son numaranın bir üstünü yazın **Protocol** Bölümünden **TCP** yi seçin **Local Address** bölümlerine PC, DVR veya IP kameranın IP numarasını yazınız. **Port** bölümlerine de açmak istediğiniz port numarasını yazınız ve **Save Changes** butonuna tıklayınız.

### NAT Rule - Add

**NAT Rule Information**

Rule Flavor:	RDR
Rule ID:	6
IF Name:	ppp-0
Protocol:	TCP
Local Address From:	10 0 0 4
Local Address To:	10 0 0 4
Global Address From:	0 0 0 0
Global Address To:	0 0 0 0
Destination Port From:	Any other port 4662
Destination Port To:	Any other port 4662
Local Port:	Any other port 4662

**Save Changes** **Close**

Aynı işlemi UDP protokolü içinde aşağıdaki gibi

### NAT Rule - Add

**NAT Rule Information**

Rule Flavor: RDR

Rule ID: 7

IF Name: ppp-0

Protocol: UDP

Local Address From: 10.0.0.4

Local Address To: 10.0.0.4

Global Address From: 0.0.0.0

Global Address To: 0.0.0.0

Destination Port From: Any other port 4672

Destination Port To: Any other port 4672

Local Port: Any other port 4672

Save Changes Close

Karşınıza aşağıdaki menü çıkacaktır. Burda son ilave ettiğiniz 7 numaralı NAT Rule görülecektir. Şimdi yaptıklarınızı kayıt etmek için **Write Settings to Flash** butonuna basın.
