

### AXIS Q60-C PTZ Dome Network Cameras

High-speed PTZ domes with active cooling.

- > Operate in temperatures up to 75 °C (167 °F)
- Easy and reliable installation: dustand waterproof, meet military standard
- > Powerful zoom; resolutions up to HDTV 1080p
- > SFP slots for fiber, RJ-45 connections
- > I/O for alarm in/out

The top-of-the-line AXIS Q60-C PTZ Dome Network Cameras provide exceptional and reliable surveillance in environments such as deserts, where high ambient temperatures and solar radiation require cameras to operate in extreme heat. The robust AXIS Q60-C cameras are ideal for use at construction and open-pit mining sites, along pipelines, and for city surveillance.

With a built-in active cooling system, AXIS Q60 cameras can operate in temperatures up to 75 °C (167 °F). The robust cameras meet the tough military standard, MIL-STD-810G, ensuring reliable operation in harsh weather conditions such as sandstorms. Installing the outdoor-ready cameras is fast and easy. No additional housing is required.

AXIS Q60-C camera models support resolutions ranging from D1, up to HDTV 1080p. They enable wide area coverage with high-speed 360° pan and powerful zoom for capturing details.

The supplied media converter switch allows AXIS Q60-C cameras to be connected in a daisy chain to the network using standard network or fiber optic cables that help lower the cost of installing the cameras over long distances. The media converter switch also enables the cameras to connect to external alarm devices via two configurable input/output ports, and to 12 V power.

AXIS Q60-C cameras, which support day/night functionality and H.264 compression, ensure the delivery of high-quality video even under extreme conditions.

Mounting brackets are sold separately.

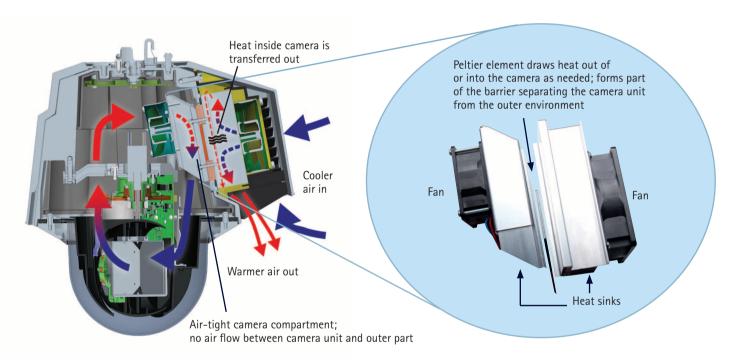

## Exceptional video surveillance in searing heat

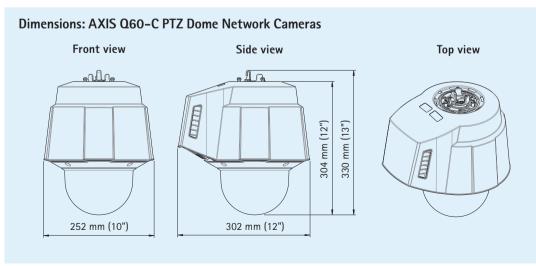

AXIS Q60-C PTZ domes ensure reliable surveillance in demanding environments. The cameras are tested to meet the tough MIL-STD-810G standard for high temperature, temperature shock, radiation, rain, humidity, salt fog, sand and dust.

With precision pan/tilt performance, the high-speed AXIS Q60-C cameras can follow a walking person or pan at a speed of 450° per second. The cameras also have powerful zoom. AXIS Q6035-C, for example, can capture the license plate of cars up to 275 m (900 ft.) away. The cameras support full frame rate video in resolutions up to HDTV 1080p (1920x1080), wide dynamic range, automatic guard tour, alarm management and intelligent video capabilities such as autotracking and Active Gatekeeper.

#### **Engineered for handling extreme heat**

AXIS Q60-C cameras use Peltier technology to increase the operating temperature to 75 °C (167 °F). The advanced climate control also handles rapid temperature changes to eliminate condensation on the clear dome cover. The system ensures that the cameras always operate at an optimal temperature to reduce wear and tear to maintain the cameras' lifetime.

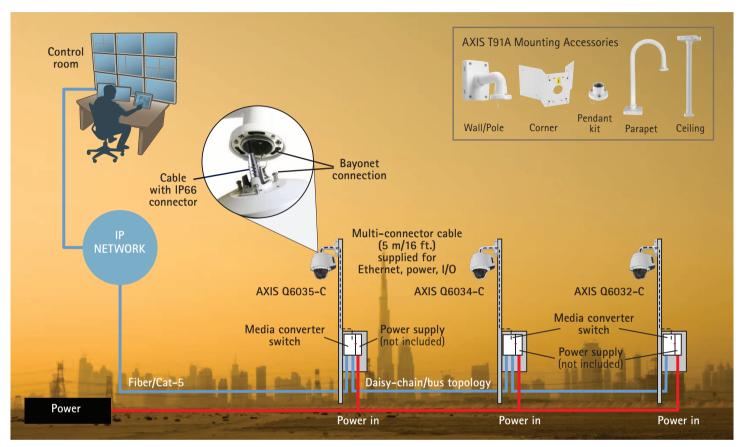

# Easy installation and reliable performance

An AXIS Q60-C connects to the supplied AXIS T8605 Media Converter Switch using a multi-connector cable, which attaches to the camera with a simple click. Through the media converter switch, the multi-connector cable enables the camera to receive power, and send and receive data to and from external alarm devices and the network. Two SFP slots and two RJ-45 connectors in the media converter switch give installers the flexibility

to network the cameras cost-effectively over long distances in a daisy chain or in a ring topology for increased reliability in the event of a single point of failure.\* The RJ-45 connectors can also be used for connection to complementary cameras such as a thermal camera or temporarily to a laptop to service the system locally. With bayonet mounting, AXIS Q60-C cameras attach easily to Axis' standard mounting accessories.

UL+CSA 60601-1 2nd Edition,

CB Scheme 60950-1,

EN 61347-1/-2-13, IP64

conditions

**Dimensions** 178 x 102 x 38 mm (7" x 4" x 1.2")

Power out 12.5 V DC +/-0.2 V DC, 85 W

### Technical specifications – AXIS Q60-C PTZ Dome Network Cameras

Cameras		System integration	
Models	AXIS Q6032-C 60 Hz, AXIS Q6032-C 50 Hz AXIS Q6034-C 60 Hz, AXIS Q6034-C 50 Hz AXIS Q6035-C 60 Hz, AXIS Q6035-C 50 Hz	Application Programming Interface	Open API for software integration, including VAPIX® and AXIS Camera Application Platform from Axis Communications; specifications available at www.axis.com
