Overview

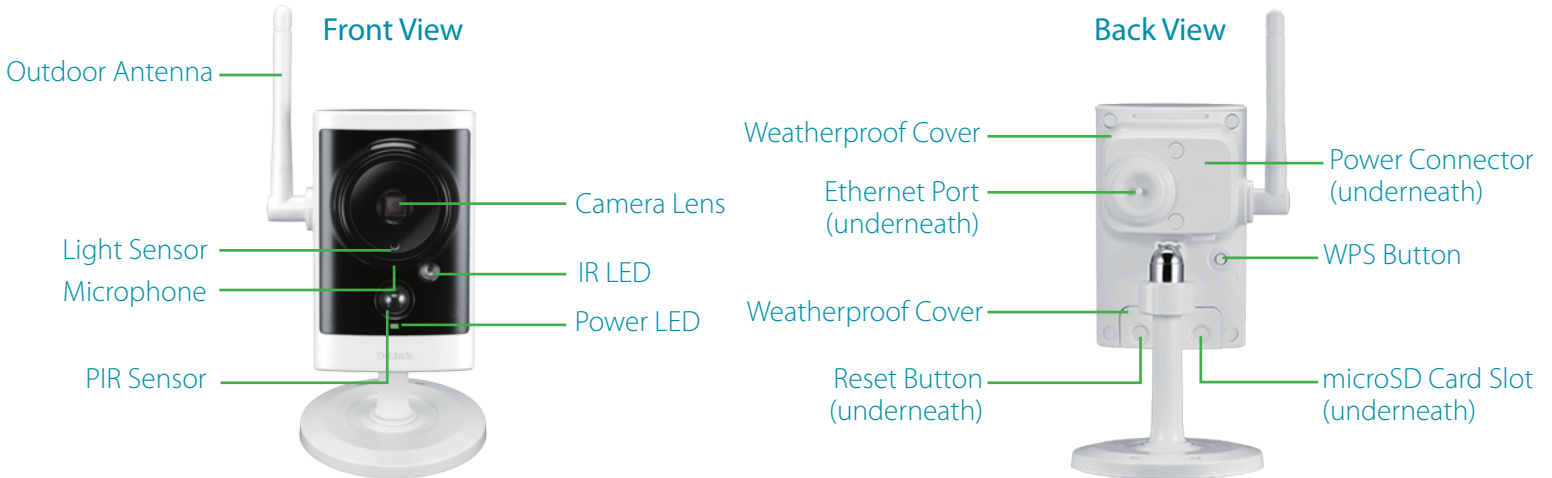

The HD Outdoor Wi-Fi Camera (DCS-2330L) is the perfect solution for monitoring an outdoor area 24 hours a day from anywhere. This mydlink-enabled IP surveillance camera is built to last with rugged metal housing while the megapixel image sensor and IR LED illuminator give you high-quality resolutions up to 720p HD even in complete darkness. A passive infrared (PIR) sensor detects motion near the camera, allowing it to automatically record video and send you a notification when motion is detected. A built-in microphone allows for audio monitoring, which is ideal for use in entry ways.

Built for the Outdoors

Specially built for outdoor use, the DCS-2330L has an IP65 weatherproof housing that protects it from dirt and rain. Wireless N connectivity means you can put it anywhere within range of your wireless network, giving you the freedom to install it right where you need camera coverage. Get a closer look with ePTZ, which lets you zoom in, zoom out, and pan across your camera's video so you can survey a large area easily. The HD Outdoor Wi-Fi Camera is a self-sufficient surveillance solution, capable of recording snapshots and video to a MicroSD card without requiring a PC or network storage device.

Convenient Access Anytime, Anywhere with mydlink®

Enhanced with mydlink® support, the HD Outdoor Wi-Fi Camera makes it easy and convenient for you to look after your family, pets, home or small business. With a mydlink enabled camera, you can stay connected to everything you love from anywhere, anytime. Access your camera through the mydlink website or one of the mydlink mobile apps to view and manage your camera through your desktop, laptop, tablet or mobile phone, no matter where you are.
