

## **Key features**

- Robust switching at the enterprise network edge
- Advanced Layer 3 and multicast routing
- IRF-automated stack and switching fabric setup
- Integrated and distributed security enforcement
- Enterprise-level nonblocking performance

### **Product overview**

The HP 3600 EI Switch Series delivers premium levels of intelligent and resilient performance, security, and reliability for robust switching at the enterprise network edge. The series consists of Layer 3 Fast Ethernet and PoE/PoE+ switches, with advanced features that can accommodate the most demanding applications. Secure, resilient connectivity and the latest traffic-prioritization technologies enhance converged networks. Designed for increased flexibility and scalability, HP 3600 EI series switches come with 24 or 48 10/100 ports, four active SFP-based Gigabit Ethernet ports for stacking and uplinks, and a 24-port 100BASE-FX switch with two or four Gigabit Ethernet SFP slots.

## **Features and benefits**

#### **Quality of Service (QoS)**

#### Broadcast control

allows limitation of broadcast traffic rate to cut down on unwanted network broadcast traffic

#### Advanced classifier-based QoS

classifies traffic using multiple match criteria based on Layer 2, 3, and 4 information; applies QoS policies such as setting priority level and rate limit to selected traffic on a per-port or per-VLAN basis

#### Powerful QoS feature

supports the following congestion actions: strict priority (SP) queuing, weighted round robin (WRR), weighted fair queuing (WFQ), and WRED

#### Traffic policing

supports Committed Access Rate (CAR) and line rate

• RRPP

enables ultra high levels of network resiliency, with failover times of less than 50 ms

#### Management

#### IPv6 management for v2 switches

future-proofs networking, as the switch is capable of being managed whether the attached network is running IPv4 or IPv6; supports pingv6, tracertv6, Telnetv6, TFTPv6, DNSv6, syslogv6, FTPv6, SNMPv6, DHCPv6, and RADIUS for IPv6

- Friendly port names allow assignment of descriptive names to ports
- Remote configuration and management is available through a secure Web browser or a command-line interface (CLI)
- Manager and operator privilege levels enable read-only (operator) and read/write (manager) access on CLI and Web browser management interfaces
- Command authorization

leverages HWTACACS to link a custom list of CLI commands to an individual network administrator's login; also provides an audit trail

Secure Web GUI

provides a secure, easy-to-use graphical interface for configuring the module via HTTPS

### Multiple configuration files

can be stored to the flash image

#### Complete session logging

provides detailed information for problem identification and resolution

#### SNMPv1, v2c, and v3

facilitate centralized discovery, monitoring, and secure management of networking devices

#### • Local and Remote Intelligent Mirroring

mirrors traffic from a switch port or to a remote switch port anywhere on the network, or mirrors ACL-selected traffic to a local switch port

• IEEE 802.1AB Link Layer Discovery Protocol (LLDP)

automated device discovery protocol provides easy mapping of network management applications

#### Management VLAN

segments traffic to and from management interfaces, including CLI/telnet, a Web browser interface, and SNMP

#### • Device Link Detection Protocol (DLDP)

monitors a cable between two switches and shuts down the ports on both ends if the cable is broken, preventing network problems such as loops

#### • Troubleshooting

ingress and egress port monitoring enable network problem solving; virtual cable tests provide visibility into cable problems

#### • sFlow (RFC 3176)

provides scalable ASIC-based wire-speed network monitoring and accounting with no impact on network performance; this allows network operators to gather a variety of sophisticated network statistics and information for capacity planning and real-time network monitoring purposes

#### Remote Intelligent Mirroring

mirrors ingress/egress ACL-selected traffic from a switch port or VLAN to a local or remote switch port anywhere on the network

#### Connectivity

#### • Auto-MDIX

automatically adjusts for straight-through or crossover cables on all 10/100 and 10/100/1000 ports

Jumbo packet support

supports up to 9216-byte frame size to improve the performance of large data transfers

• Gigabit Ethernet uplinks

dual-personality ports for either 10/100/1000 or mini-GBIC SFP connectivity for increased connectivity flexibility

#### High-density access

provides up to 48 fixed 10/100BASE-T PoE or non-PoE ports or 24 SFP 100BASE-X ports in a Layer 2/Layer 3 switch

#### • IEEE 802.3af Power over Ethernet (PoE)

provides up to 15.4 W per port to IEEE 802.3af-compliant PoE-powered devices such as IP phones, wireless access points, and security cameras

• Ethernet OAM

provides a Layer 2 link performance and fault detection monitoring tool, which reduces failover and network convergence times

#### • IEEE 802.3at Power over Ethernet (PoE+) support

simplifies deployment and dramatically reduces installation costs by helping to eliminate the time and cost involved in supplying local power at each access point location

#### Performance

Gigabit Ethernet interface

provides a connection to the network that eliminates the network as a bottleneck

- Nonblocking performance up to 17.6 Gbps nonblocking switching fabric provides wire-speed switching with up to 13.1 million pps throughput
- Hardware-based wire-speed access control lists feature-rich ACL implementation helps ensure high levels of security and ease of administration without impacting network performance

#### **Resiliency and high availability**

- Separate data and control paths keeps control separated from services and keeps service processing isolated; increases security and performance
- External redundant power supply provides high reliability
- Smart link allows 50 ms failover between links
- Spanning Tree/MSTP, RSTP provides redundant links while preventing network loops
- Virtual Router Redundancy Protocol (VRRP) allows a group of routers to dynamically back each other up to create highly available routed environments
- Intelligent Resilient Framework (IRF) creates virtual resilient switching fabrics, where two or more switches perform as a single Layer 2 switch and Layer 3 router; switches do not have to be co-located and can be part of a

disaster-recovery system; servers or switches can be attached using standard LACP for automatic load balancing and high availability; simplifies network operation by eliminating the complexity of Spanning Tree Protocol, Equal-Cost Multipath (ECMP), or VRRP

• IEEE 802.3ad Link Aggregation Control Protocol (LACP) supports up to 24 trunks, each with 8 links per trunk; supports static or dynamic groups

#### Manageability

• RMON (remote monitoring)

provides advanced monitoring and reporting capabilities for statistics, history, alarms, and events

#### Layer 2 switching

- 16/32K MAC address table provides access to many Layer 2 devices
- VLAN support and tagging support IEEE 802.1Q with 4,094 simultaneous VLAN IDs
- GARP VLAN Registration Protocol allows automatic learning and dynamic assignment of VLANs

#### • IEEE 802.1ad QinQ and Selective QinQ

increase the scalability of an Ethernet network by providing a hierarchical structure; connect multiple LANs on a high-speed campus or metro network

Gigabit Ethernet port aggregation

allows grouping of ports to increase overall data throughput to a remote device

 Internet Group Management Protocol (IGMP) and Multicast Listener Discovery (MLD) protocol snooping effectively control and manage the flooding of multicast packets in a Layer 2 network

#### Layer 3 services

Address Resolution Protocol (ARP)

determines the MAC address of another IP host in the same subnet

- Dynamic Host Configuration Protocol (DHCP) simplifies the management of large IP networks and supports client and server; DHCP Relay enables DHCP operation across subnets
- Loopback interface address

defines an address in Routing Information Protocol (RIP) and OSPF that can always be reachable, improving diagnostic capability

User Datagram Protocol (UDP) helper function

allows UDP broadcasts to be directed across router interfaces to specific IP unicast or subnet broadcast addresses and prevents server spoofing for UDP services such as DHCP

Route maps

provide more control during route redistribution; allow filtering and altering of route metrics

#### Layer 3 routing

 IPv4 routing protocols support static routes, RIP, OSPF, ISIS, and BGP

- IPv6 routing protocols for v2 switches provide routing of IPv6 at wire speed; support static routes, RIPng, OSPFv3, ISIS for IPv6, and BGP4+ for IPv6
- IPv6 tunneling allows a smooth transition from IPv4 to IPv6 by encapsulating IPv6 traffic over an existing IPv4 infrastructure
- Equal-Cost Multipath (ECMP) enables multiple equal-cost links in a routing environment to increase link redundancy and scale bandwidth
- PIM-SSM, PIM-DM, and PIM-SM (for IPv4 and IPv6) support IP Multicast address management and inhibition of DoS attacks
- Multicast Source Discovery Protocol (MSDP) is used for inter-domain multicast applications, allowing multiple PIM-SM domains to interoperate
- **Bidirectional Forwarding Detection (BFD)** enables link connectivity monitoring and reduces network convergence time for RIP, OSPF, BGP, IS-IS, VRRP, and IRF

#### IGMPv1, v2, and v3

allow individual hosts to be registered on a particular VLAN

#### Security

#### Access control lists (ACLs)

provides IP Layer 2 to Layer 4 traffic filtering; supports VLAN ACL and port ACL

#### • Multiple user authentication methods

#### - IEEE 802.1X

is an industry-standard method of user authentication using an IEEE 802.1X supplicant on the client in conjunction with a RADIUS server

#### – Web-based authentication

similar to IEEE 802.1X, it provides a browser-based environment to authenticate clients that do not support the IEEE 802.1X supplicant

#### - MAC-based authentication

authenticates the client with the RADIUS server based on the client's MAC address

#### Identity-driven security and access control

#### - Per-user ACLs

permits or denies user access to specific network resources based on user identity and time of day, allowing multiple types of users on the same network to access specific network services without risking network security or allowing unauthorized access to sensitive data

#### - Automatic VLAN assignment

automatically assigns users to the appropriate VLAN based on their identities

#### Secure management access

securely encrypts all access methods (CLI, GUI, or MIB) through SSHv2, SSL, and/or SNMPv3

#### Secure FTP

allows secure file transfer to and from the switch; protects against unwanted file downloads or unauthorized copying of a switch configuration file

• Guest VLAN

similar to IEEE 802.1X, it provides a browser-based environment to authenticated clients

#### • Endpoint Admission Defense (EAD)

provides security policies to users accessing a network

#### Port security

allows access only to specified MAC addresses, which can be learned or specified by the administrator

Port isolation

secures and adds privacy, and prevents malicious attackers from obtaining user information

#### • ICMP throttling

defeats ICMP denial-of-service attacks by enabling any switch port to automatically throttle ICMP traffic

#### • STP BPDU port protection

blocks Bridge Protocol Data Units (BPDUs) on ports that do not require BPDUs, preventing forged BPDU attacks

• STP Root Guard

protects the root bridge from malicious attacks or configuration mistakes

DHCP protection
blocks DHCP packets from unauthorized I

blocks DHCP packets from unauthorized DHCP servers, preventing denial-of-service attacks

• Dynamic ARP protection

blocks ARP broadcasts from unauthorized hosts, preventing eavesdropping or theft of network data

- IP Source Guard helps prevent IP spoofing attacks
- RADIUS/HWTACACS eases switch management security administration by using a password authentication server
- Multiple Customer Edge (MCE) facilitates MPLS VPN network integration with support for up to 63 VPNs

#### Convergence

IEEE 802.1AB Link Layer Discovery Protocol (LLDP)

is an automated device discovery protocol that provides easy mapping of network management applications

• LLDP-MED

is a standard extension that automatically configures network devices, including LLDP-capable IP phones

• LLDP-CDP compatibility

receives and recognizes CDP packets from Cisco's IP phones for seamless interoperation

• PoE allocations

support multiple methods (automatic, IEEE 802.3af class, LLDP-MED, or user specified) to allocate PoE power for more efficient energy savings

• Voice VLAN

automatically assigns VLAN and priority for IP phones, simplifying network configuration and maintenance

- IP multicast snooping and data-driven IGMP automatically prevent flooding of IP multicast traffic
- Protocol Independent Multicast (PIM) is used for multicast applications; supports PIM Dense Mode (PIM-DM) and Sparse Mode (PIM-SM)
- Multicast Source Discovery Protocol (MSDP) is used for inter-domain multicast applications, allowing multiple PIM-SM domains to interoperate
- Multicast VLAN

allows multiple VLANs to receive the same multicast traffic, reducing network bandwidth demand by eliminating multiple streams to each VLAN

#### **Device support**

#### Cisco prestandard PoE support

detects and provides power to Cisco's prestandard PoE devices such as wireless LAN access points and IP phones

#### **Additional information**

- Green initiative support provides support for RoHS and WEEE regulations
- Green IT and power

uses the latest advances in silicon development and shuts off unused ports to improve power efficiency

#### Warranty and support

#### • Lifetime warranty

for as long as you own the product with advance replacement and next-business-day delivery (available in most countries)†

#### • Electronic and telephone support

limited electronic and telephone support is available from HP; to reach our support centers, refer to

www.hp.com/networking/contact-support; for details on the duration of support provided with your product purchase, refer to www.hp.com/networking/warrantysummary

#### Software releases

to find software for your product, refer to www.hp.com/networking/support; for details on the software releases available with your product purchase, refer to www.hp.com/networking/warrantysummary

tHP warranty includes repair or replacement of hardware for as long as you own the product, with next business day advance replacement (available in most countries). The disk drive included with HP AllianceOne Advanced Services and Services zl Modules, HP Threat Management Services zl Module, HP AllianceOne Extended zl Module with Riverbed Steelhead, HP MSM765zl Mobility Controller and HP Survivable Branch Communication zl Module powered by Microsoft Lync has a five-year hardware warranty. For details, refer to the Software license and hardware warranty statements at **www.hp.com/networking/warranty**.

### Specifications

	HP 3600-24-SFP EI Switch (JD334A)	HP 3600-24-PoE+ v2 El Switch (JG301A)	HP 3600-24 v2 El Switch (JG299A)

Frequency	50/60 Hz	50/60 Hz	50/60 Hz
Notes	Maximum power rating and maximum heat dissipation are the worst-case theoretical maximum numbers provided for planning the infrastructure with fully loaded PoE (if equipped), 100% traffic, all ports plugged in, and all modules populated.	Maximum power rating and maximum heat dissipation are the worst-case theoretical maximum numbers provided for planning the infrastructure with fully loaded PoE (if equipped), 100% traffic, all ports plugged in, and all modules populated. PoE power is the power supplied by the internal power supply. It is dependent on the type and quantity of power supplies and may be supplemented with the use of an external power supply (EPS). With AC input, the maximum power consumption is 465 W; PoE is 370 W. With DC input, the maximum power consumption is 795 W; PoE is 720 W.	Maximum power rating and maximum heat dissipation are the worst-case theoretical maximum numbers provided for planning the infrastructure with fully loaded PoE (if equipped), 100% traffic, all ports plugged in, and all modules populated.

		50/5011-	
Frequency	50/60 Hz	50/60 Hz	50/60 Hz
Notes	Maximum power rating and maximum heat dissipation are the worst-case theoretical maximum numbers provided for planning the infrastructure with fully loaded PoE (if equipped), 100% traffic, all ports plugged in, and all modules populated.	Maximum power rating and maximum heat dissipation are the worst-case theoretical maximum numbers provided for planning the infrastructure with fully loaded PoE (if equipped), 100% traffic, all ports plugged in, and all modules populated.	Maximum power rating and maximum heat dissipation are the worst-case theoretical maximum numbers provided for planning the infrastructure with fully loaded PoE (if equipped), 100% traffic, all ports plugged in, and all modules populated. PoE power is the power supplied by the internal power supply. It is dependent on the type and quantity of power supplies and may be supplemented with the use of an external power supply (EPS). With AC input, the maximum power consumption is 440 W, PoE is 320 W. With DC input, the maximum power consumption is 820 W, PoE is 720 W.

## HP 3600 El Switch Series accessories

#### Transceivers

HP X125 1G SFP LC LH40 1310nm Transceiver (JD061A) HP X120 1G SFP LC LH40 1550nm Transceiver (JD062A) HP X125 1G SFP LC LH70 Transceiver (JD063B) HP X120 1G SFP RJ45 T Transceiver (JD089B) HP X110 100M SFP LC LH40 Transceiver (JD090A) HP X110 100M SFP LC LH80 Transceiver (JD091A) HP X120 1G SFP LC BX 10-U Transceiver (JD098B) HP X120 1G SFP LC BX 10-D Transceiver (JD099B) HP X115 100M SFP LC BX 10-U Transceiver (JD100A) HP X115 100M SFP LC BX 10-D Transceiver (JD101A) HP X110 100M SFP LC FX Transceiver (JD102B) HP X120 1G SFP LC LH100 Transceiver (JD103A) HP X170 1G SFP LC LH70 1550 Transceiver (JD109A) HP X170 1G SFP LC LH70 1570 Transceiver (JD110A) HP X170 1G SFP LC LH70 1590 Transceiver (JD111A) HP X170 1G SFP LC LH70 1610 Transceiver (JD112A) HP X170 1G SFP LC LH70 1470 Transceiver (JD113A) HP X170 1G SFP LC LH70 1490 Transceiver (JD114A) HP X170 1G SFP LC LH70 1510 Transceiver (JD115A) HP X170 1G SFP LC LH70 1530 Transceiver (JD116A) HP X120 1G SFP LC SX Transceiver (JD118B) HP X120 1G SFP LC LX Transceiver (JD119B) HP X110 100M SFP LC LX Transceiver (JD120B)

#### Cables

HP 3600 Switch SFP Stacking Kit (JD324B) HP 0.5 m Multimode OM3 LC/LC Optical Cable (AJ833A) HP 1 m Multimode OM3 LC/LC Optical Cable (AJ834A) HP 2 m Multimode OM3 LC/LC Optical Cable (AJ835A) HP 5 m Multimode OM3 LC/LC Optical Cable (AJ836A) HP 15 m Multimode OM3 LC/LC Optical Cable (AJ837A) HP 30 m Multimode OM3 LC/LC Optical Cable (AJ838A) HP 50 m Multimode OM3 LC/LC Optical Cable (AJ839A) HP 0.5 m PremierFlex OM3+ LC/LC Optical Cable (BK837A) HP 1 m PremierFlex OM3+ LC/LC Optical Cable (BK838A) HP 2 m PremierFlex OM3+ LC/LC Optical Cable (BK839A) HP 5 m PremierFlex OM3+ LC/LC Optical Cable (BK840A) HP 15 m PremierFlex OM3+ LC/LC Optical Cable (BK841A) HP 30 m PremierFlex OM3+ LC/LC Optical Cable (BK842A) HP 50 m PremierFlex OM3+ LC/LC Optical Cable (BK843A)

#### **Power Supply**

HP RPS 800 Redundant Power Supply (JD183A) HP RPS1600 Redundant Power System (JG136A) HP RPS1600 1600W AC Power Supply (JG137A)

#### **Power cords**

HP X290 500 V 1m RPS Cable (JD186A) HP X290 1000 A JD5 2m RPS Cable (JD187A) HP X290 1000 A JD5 Non-PoE 2m RPS Cable (JD188A) HP X290 1000 B JD5 2m RPS Cable (JD189A)
