SP5532SP/SP5532SW

Pan/Tilt IP Camera

Micronets SP5532SP/SP5532SW is a superior Megapixel resolution with H.264 compression Pan/Tilt network camera with built-in IR LED Day/Night function and microphone. With Megapixel and H.264 compression, it provides low bandwidth streaming and reduced storage without compromising in image quality. The Pan/Tilt function offers 355° pan and 120° tilt control, allows the camera to secure a much larger and wider area. Day/Night function allows the camera to operate effectively in low light environment or even in total darkness for 24-hour surveillance.
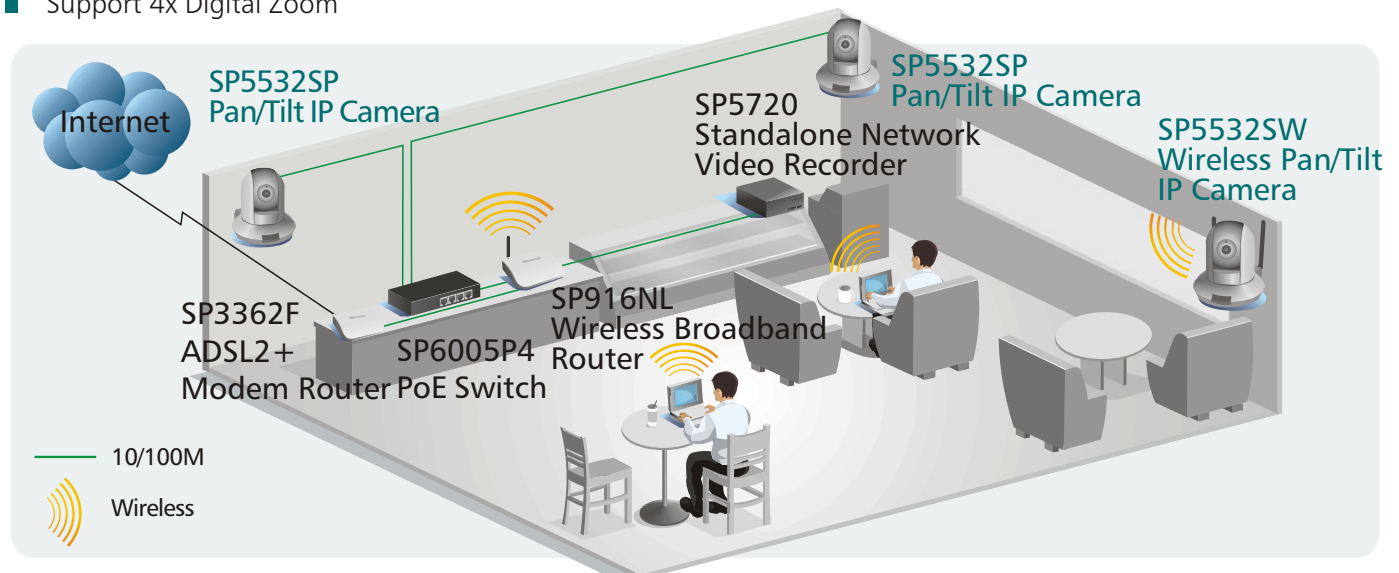

Micronet SP5532SP/SP5532SW comes in both standards wireless IEEE 802.11 b/g/n and Power over Ethernet (PoE) for easy and flexible installation makes it ideal for all indoor and home surveillance.

You can quickly and easily access this camera to view the current status of your children, the elderly, or even your pets with live, clear videos while you're away from home. Micronets home surveillance series comes with iPhone compatibility. It enables users not only to receive the optimized, synchronized video and audio by the standard web browser or with Micronets NVR system SP5720 but also 3G cellular phones or any compatible media device anytime, anywhere.
