

IGPS-9042GP-24V

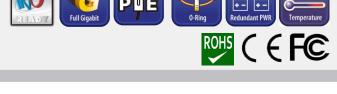

Industrial 6-port managed Gigabit PoE Ethernet switch with 4x10/100/1000Base-T(X) P.S.E.

ports and 2x100/1000Base-X, SFP socket, 24VDC power inputs

Features

- Support O-Ring (recovery time < 30ms over 250 units of connection) and MSTP(RSTP/STP compatible) for Ethernet Redundancy
- > **Open-Ring** support the other vendor's ring technology in open architecture
- > O-Chain allow multiple redundant network rings
- > Support standard IEC 62439-2 MRP (Media Redundancy Protocol) function
- 4 port P.S.E. fully compliant with IEEE802.3at standard, provide up to 30 Watts per port
- Support PoE scheduled configuration and PoE auto-ping check function
- Support IEEE 1588v2 clock synchronization
- Support IPV6 new internet protocol version
- > Support Modbus TCP protocol
- > Support IEEE 802.3az Energy-Efficient Ethernet technology
- Provided HTTPS/SSH protocol to enhance network security
- Support SMTP client and NTP server
- Support IP-based bandwidth management
- Support application-based QoS management
- Support Device Binding security function
- Support DOS/DDOS auto prevention
- > IGMP v2/v3 (IGMP snooping support) for filtering multicast traffic
- Support SNMP v1/v2c/v3 & RMON & 802.1Q VLAN Network Management
- > Support ACL, TACACS+ and 802.1x User Authentication for security
- Supports 9.6K Bytes Jumbo Frame
- > Multiple notification for warning of unexpected event
- > Web-based ,Telnet, Console (CLI), and Windows utility (**Open-Vision**) configuration
- Support LLDP Protocol
- Rigid IP-30 housing design
- DIN-Rail and wall mounting enabled

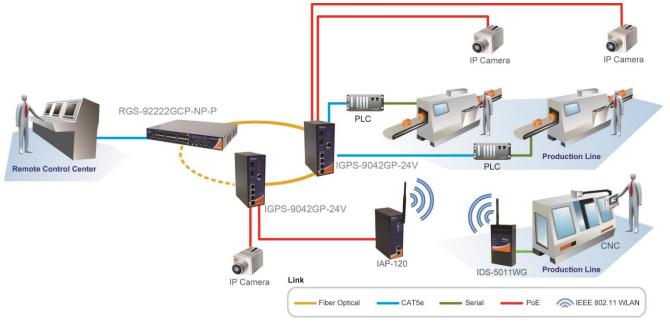

Introduction

IGPS-9042GP-24V is a managed redundant ring PoE Ethernet switch with 4x10/100/1000Base-T(X) IEEE 802.3at P.S.E. ports and 2x100/1000Base-X SFP ports. The switch support Ethernet Redundancy protocol, **O-Ring** (recovery time < 30ms over 250 units of connection) and MSTP (RSTP/STP compatible) can protect your mission-critical applications from network interruptions or temporary malfunctions with its fast recovery technology. IGPS-9042GP-24V also support Power over Ethernet, a system to transmit electrical power up to **30 watts**, along with data, to remote devices over standard twisted-pair cable in an Ethernet network. Each IGPS-9042GP-24V switch has 4x10/100/1000Base-T(X) P.S.E. (Power Sourcing Equipment) ports. P.S.E. is a device (switch or hub for instance) that will provide power in a POE connection. And support wide operating temperature from -40 °C to 75 °C. IGPS-9042GP-24V can also be managed centralized and convenient by

Open-Vision, Except the Web-based interface, Telnet and console (CLI) configuration. Therefore, the switch is one of the most reliable choice for highly-managed and Fiber Ethernet application.

- **O-Ring :** O-Ring is ORing's proprietary redundant ring technology, with recovery time of less 30 milliseconds and up to 250 nodes. The O-Ring redundant ring technology can protect mission-critical application from network interruptions or temporary malfunction with its fast recover technology.
- **Open-Ring :** Open-Ring is an enhanced redundant technology that makes ORing's switches compatible with other vendor's proprietary redundant ring technologies. It enables ORing's switches to form a single ring with other vendor's switch. In cases where the ring is setup using proprietary technology, ORing offers a compatibility service where ORing can make its switches compatible with your particular network requirements.
- <u>O-Chain</u> : O-Chain is the revolutionary network redundancy technology that provides the add-on network redundancy topology for any backbone network, O-Chain allows multiple redundant network rings of different redundancy protocols to join and function together as a larger and more robust compound network topology. O-Chain providing ease-of-use while maximizing fault-recovery swiftness, flexibility, compatibility, and cost-effectiveness in one set of network redundancy topology.
- MRP: Media Redundancy Protocol (MRP) is a data network protocol standardized by the IEC 62439-2. It allows rings of Ethernet switches to overcome any single failure with recovery time much faster than achievable with Spanning Tree Protocol.
- **IP-based Bandwidth Management :** The switch provide advanced IP-based bandwidth management which can limit the maximum bandwidth for each IP device. User can configure IP camera and NVR with more bandwidth and limit other device bandwidth.
- **Application-Based QoS :** The switch also support application-based QoS. Application-based QoS can set highest priority for data stream according to TCP/UDP port number.
- **Device Binding Function :** ORing special Device Binding function can only permit allowed IP address with MAC address to access the network. Hacker cannot access the IP surveillance network without permission. It can avoid hacker from stealing video privacy data and attacking IP camera, NVR and controllers.
- Advanced DOS/DDOS Auto Prevention : The switch also provided advanced DOS/DDOS auto prevention. If there is any IP flow become big in short time, the switch will lock the source IP address for certain time to prevent the attack. It's hardware based prevention so it can prevent DOS/DDOS attack immediately and completely.
- **IEEE 1588v2 Technology :** The IEEE 1588v2 technology can fulfill precision time synchronization requirements for protection and control applications.
- Modbus TCP : This is a Modbus variant used for communications over TCP/IP networks.
- **IEEE 802.3az Energy-Efficient Ethernet :** This is a set of enhancements to the twisted-pair and backplane Ethernet family of networking standards that will allow for less power consumption during periods of low data activity. The intention was to reduce power consumption by 50% or more.

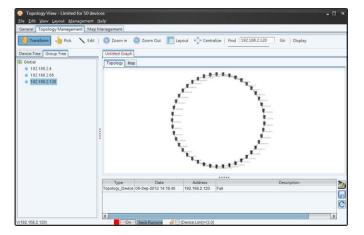

Open-Vision

ORing's switches are intelligent switches. Different from other traditional redundant switches, ORing provides a set of Windows utility (Open-Vision) for user to manage and monitor all of industrial Ethernet switches on the industrial network.

	IEEE 802.3x for Flow control				
	IEEE 802.3ad for LACP (Link Aggregation Control Protocol)				
Ethernet Standards	IEEE 802.1p for COS (Class of Service)				
	IEEE 802.1Q for VLAN Tagging				
	IEEE 802.1D for STP (Spanning Tree Protocol)				
	IEEE 802.1w for RSTP (Rapid Spanning Tree Protocol)				
	IEEE 802.1s for MSTP (Multiple Spanning Tree Protocol)				
	IEEE 802.1x for Authentication				
	IEEE 802.1AB for LLDP (Link Layer Discovery Protocol)				
	IEEE 1588v2 clock synchronization				

	IEEE 802.3at PoE specification (up to 30 Watts per port for P.S.E.)				
PoE Output Watts	12 ~24VDC : 60Watts Max.				
	24 ~ 57VDC:120Watts Max.				
MAC Table	8k				
Priority Queues	8				
Processing	Store-and-Forward				
	Switching latency: 7 us Switching bandwidth: 12Gbps				
	Max. Number of Available VLANs: 4095				
Switch Properties	VLAN ID Range : VID 1 to 4094				
	IGMP multicast groups: 128 for each VLAN				
	Port rate limiting: User Define				
Jumbo frame	Up to 9.6K Bytes				
	Device Binding security feature				
	Enable/disable ports, MAC based port security				
	Port based network access control (802.1x)				
Security Features	VLAN (802.1Q) to segregate and secure network traffic				
	Radius centralized password management SNMPv3 encrypted authentication and access security				
	Https / SSH enhance network security				
	STP/RSTP/MSTP (IEEE 802.1D/w/s)				
	Redundant Ring (O-Ring) with recovery time less than 30ms over 250 units				
	TOS/Diffserv supported				
	Quality of Service (802.1p) for real-time traffic				
	VLAN (802.1Q) with VLAN tagging				
	IGMP Snooping				
Software Features	IP-based bandwidth management				
	Application-based QoS management				
	DOS/DDOS auto prevention				
	Port configuration, status, statistics, monitoring, security DHCP Server/Client/Relay				
	SMTP Client				
	Modbus TCP				
	NTP server				
	O-Ring				
	Open-Ring				
Network Redundancy	O-Chain				
	MRP				
	MSTP (RSTP/STP compatible)				
RS-232 Serial Console Port	RS-232 in RJ45 connector with console cable. 115200bps, 8, N, 1				
LED Indicators					
Power Indicator (PWR)	Green : Power LED x 3				
Ring Master Indicator (R.M.)	Green : Indicates that the system is operating in O-Ring Master mode				
O-Ring Indicator (Ring)	Green : Indicates that the system operating in O-Ring mode				
	Green Blinking : Indicates that the Ring is broken.				
Fault Indicator (Fault)	Amber : Indicate unexpected event occurred				
10/100/1000Base-T(X) RJ45 Port	Green for port Link/Act.				
Indicator	Dual color LED for speed indicator : Green for 1000Mbps, Amber for 100Mbps, Off-light for 10Mbps				
100/1000Base-X SFP Port Indicator	Green for port Link/Act.				
Fault Contact
