

## RGPS-92222GCP-NP Series

Industrial 26-port managed Gigabit PoE Ethernet switch with 22x10/100/1000Base-T(X) P.S.E., 2xGigabit combo P.S.E. and 2x100/1000Base-X, SFP socket

# **Features**

- Support O-Ring (recovery time < 30ms over 250 units of connection) and MSTP(RSTP/STP compatible) for Ethernet
- **Open-Ring** support the other vendor's ring technology in open architecture
- O-Chain allow multiple redundant network rings
- Support standard IEC 62439-2 MRP (Media Redundancy Protocol) function
- 24 port P.S.E. fully compliant with IEEE802.3at standard, provide up to 30 Watts per port
- Support PoE on/off scheduled configuration
- Support PoE alive check and auto reboot fuction
- Support IPV6 new internet protocol version
- Support Modbus TCP protocol
- Support IEEE 802.3az Energy-Efficient Ethernet technology
- Provided HTTPS/SSH protocol to enhance network security
- Support SMTP client and NTP server protocol
- Support IP-based bandwidth management
- Support application-based QoS management
- Support Device Binding security function
- Support DOS/DDOS auto prevention
- IGMP v2/v3 (IGMP snooping support) for filtering multicast traffic
- Support SNMP v1/v2c/v3 & RMON & 802.1Q VLAN Network Management
- Support ACL, TACACS+ and 802.1x User Authentication for security
- Support 9.6K Bytes Jumbo Frame
- Support full/half-duplex transmission
- SFP socket support DDM function
- Multiple notification for warning of unexpected event
- Support DBU-01 backup unit device to quickly backup/restore configuration
- Web-based ,Telnet, Console (CLI), and Windows utility (Open-Vision) configuration
- Support LLDP Protocol
- 19 inches rack mountable design

#### Introduction

RGPS-92222GCP-NP series are Gigabit managed redundant ring PoE Ethernet switch with 22x10/100/1000Base-T(X) IEEE802.3at P.S.E. ports and 2xGigabit combo IEEE802.3at P.S.E. ports and 2x100/1000Base-X SFP ports. These switches support Ethernet Redundancy protocol, O-Ring (recovery time < 30ms over 250 units of connection) and MSTP (RSTP/STP compatible) can protect your mission-critical applications from network interruptions or temporary malfunctions with its fast recovery technology. RGPS-92222GCP-NP series also support Power over Ethernet, a system to transmit electrical power up to 30 watts, along with data, to remote devices over standard twisted-pair cable in an Ethernet network. Each RGPS-92222GCP-NP switch has (22+2) x10/100/1000Base-T(X) P.S.E. (Power Sourcing Equipment) ports. P.S.E. is a

device (switch or hub for instance) that will provide power in a PoE connection. RGPS-92222GCP-NP series can also be managed centralized and convenient by Open-Vision, Except the Web-based interface, Telnet and console (CLI) configuration. Therefore, the switch is one of the most reliable choice for highly-managed and Fiber PoE Ethernet application.

- O-Ring: O-Ring is ORing's proprietary redundant ring technology, with recovery time of less 30 milliseconds and up to 250 nodes. The O-Ring redundant ring technology can protect mission-critical application from network interruptions or temporary malfunction with its fast recover technology.
- Open-Ring: Open-Ring is an enhanced redundant technology that makes ORing's switches compatible with other vendor's proprietary redundant ring technologies. It enables ORing's switches to form a single ring with other vendor's switch. In cases where the ring is setup using proprietary technology, ORing offers a compatibility service where ORing can make its switches compatible with your particular network requirements.
- O-Chain: O-Chain is the revolutionary network redundancy technology that provides the add-on network redundancy topology for any backbone network, O-Chain allows multiple redundant network rings of different redundancy protocols to join and function together as a larger and more robust compound network topology. O-Chain providing ease-of-use while maximizing fault-recovery swiftness, flexibility, compatibility, and cost-effectiveness in one set of network redundancy topology.
- MRP: Media Redundancy Protocol (MRP) is a data network protocol standardized by the IEC 62439-2. It allows
  rings of Ethernet switches to overcome any single failure with recovery time much faster than achievable with
  Spanning Tree Protocol.
- IP-based Bandwidth Management: The switch provide advanced IP-based bandwidth management which can limit the maximum bandwidth for each IP device. User can configure IP camera and NVR with more bandwidth and limit other device bandwidth.
- <u>Application-Based QoS</u>: The switch also support application-based QoS. Application-based QoS can set highest priority for data stream according to TCP/UDP port number.
- <u>Device Binding Function</u>: ORing special Device Binding function can only permit allowed IP address with MAC address
  to access the network. Hacker cannot access the IP surveillance network without permission. It can avoid hacker
  from stealing video privacy data and attacking IP camera, NVR and controllers.
- Advanced DOS/DDOS Auto Prevention: The switch also provided advanced DOS/DDOS auto prevention. If there is any IP flow become big in short time, the switch will lock the source IP address for certain time to prevent the attack. It's hardware based prevention so it can prevent DOS/DDOS attack immediately and completely.
- Modbus TCP: This is a Modbus variant used for communications over TCP/IP networks.
- IEEE 802.3az Energy-Efficient Ethernet: This is a set of enhancements to the twisted-pair and backplane Ethernet family of networking standards that will allow for less power consumption during periods of low data activity. The intention was to reduce power consumption by 50% or more.

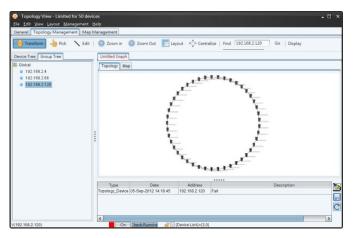

Network connection

### **Open-Vision**

ORing's switches are intelligent switches. Different from other traditional redundant switches, ORing provides a set of Windows utility (Open-Vision) for user to manage and monitor all of industrial Ethernet switches on the industrial network.

## **Specifications**

ORing Switch Model	RGPS-92222GCP-NP-LP	RGPS-92222GCP-NP-P	RGPS-92222GCP-NP
Physical Ports			
10/100/1000Base-T(X) with <b>P.S.E.</b> Ports in RJ45 Auto MDI/MDIX		22	
Gigabit Combo port with 10/100/1000Base-T(X) <b>P.S.E.</b> and 100/1000Base-X SFP ports		2	
100/1000Base-X with SFP port		2	
Technology			
Ethernet Standards	IEEE 802.3 for 10Base-T IEEE 802.3u for 100Base-TX and 10 IEEE 802.3ab for 1000Base-T	00Base-FX	

	IEEE 802.z for 1000Base-X
	IEEE 802.3x for Flow control
	IEEE 802.3ad for LACP (Link Aggregation Control Protocol )
	IEEE 802.1p for COS (Class of Service)
	IEEE 802.1Q for VLAN Tagging
	IEEE 802.1w for RSTP (Rapid Spanning Tree Protocol)
	IEEE 802.1s for MSTP (Multiple Spanning Tree Protocol)
	IEEE 802.1x for Authentication
	IEEE 802.1AB for LLDP (Link Layer Discovery Protocol)
	IEEE 802.3at PoE specification (up to 30 Watts per port for P.S.E.)
	RGPS-92222GCP-NP-LP: Total power budget is 320Watts with maximum
	RGPS-92222GCP-NP-P: Total power budget is 720Watts with maximum
	RGPS-92222GCP-NP: Total power budget is 720Watts and based-on external power supply
	spec
MAC Table	8k
Priority Queues	8
Processing	Store-and-Forward
	Switching latency: 7 us
	Switching bandwidth: 52Gbps
Switch Properties	Max. Number of Available VLANs: 4095
Switch Floberties	VLAN ID Range: VID 1 to 4094
	IGMP multicast groups: 256 for each VLAN
	Port rate limiting: User Define
Jumbo frame	Up to 9.6K Bytes
	Device Binding security feature
	Enable/disable ports, MAC based port security
	Port based network access control (802.1x)
	Single 802.1x and Multiple 802.1x
	MAC-based authentication
	QoS assignment
	Guest VLAN
Security Features	MAC address limit
Security reactives	TACACS+
	VLAN (802.1Q ) to segregate and secure network traffic
	Radius centralized password management
	SNMPv3 encrypted authentication and access security
	Https / SSH enhance network security
	Web and CLI authentication and authorization
	Authorization (15 levels)
	IP source guard
	IEEE 802.1D Bridge, auto MAC address learning/aging and MAC address (static)
	Multiple Registration Protocol (MRP)
	MSTP (RSTP/STP compatible)
	Redundant Ring (O-Ring) with recovery time less than 30ms over 250 units
	TOS/Diffserv supported
	Quality of Service (802.1p) for real-time traffic
	VLAN (802.1Q) with VLAN tagging
	IGMP v2/v3 Snooping
Software Features	IP-based bandwidth management
	Application-based QoS management
	DOS/DDOS auto prevention
	Port configuration, status, statistics, monitoring, security
	DHCP Server/Client
	DHCP Relay Madhus TCP
