

AXIS P85 Network Camera Series

Eye-level covertly mounted cameras for reliable identification

AXIS P8513 and AXIS P8514 are eye-level covertly mounted network cameras, able to prove both identification and overview video surveillance for indoor installation. The products are offering an excellent surveillance solution for retail, healthcare and banking segments.

Designed for placement near exits of buildings, the height of AXIS P85 Network Cameras are optimized in such a way that it looks straight at the face of people, allowing reliable identification even if the person is wearing a hood or baseball cap. The covert cameras are almost impossible to discover, keeping them protected from tampering and enabling them to provide perfect shots thanks to the eye-level placement.

AXIS P85 comes in three colors: black, white and chrome to blend perfectly into environments. The cameras also provide a wide overview of the environment. Providing excellent video quality at full frame rate, the camera series consists of AXIS P8513 with SVGA resolution and AXIS P8514, which supports 1 megapixel and HDTV 720p in both H.264 and Motion JPEG streams.

- > Sharp images for identification or overview
- > Excellent video quality including HDTV 720p and H.264
- > Multiple H.264 video streams
- > Quick installation with Power over Ethernet
- > Available in three colors: white, black and chrome
