XProtect® Essential+
The Most Feature-Rich, Free VMS in the Market

XProtect Essential+ is a full-featured version of Milestone's market-leading video management software (VMS) at no cost.

Supporting up to eight devices, XProtect Essential+ is the perfect match for smaller businesses who want basic video surveillance to protect employees and assets.

With the ability to integrate with other systems and applications, you can utilize thousands of solutions from Milestone's community and maximize your investment.

Reliable
24/7 peace of mind

When you don't have time to monitor your video surveillance system daily but still need to be on top of everything from anywhere, XProtect Essential+ gives you complete peace of mind.

Customizable
Our software, your solution

With XProtect Essential+ you get the freedom to build the system just the way you like it, even integrating with other systems.

Scalable
Software built for today and tomorrow

Starting with XProtect Essential+ means starting with a system that scales with you to meet your future needs.

User-friendly
Advanced system, simple use

You probably don't have time to look at your video 24/7. That's why XProtect Essential+ is designed to help you perform your tasks quickly and efficiently.

### Secure
Security you can count on

When you want to reduce the security risk of your system and protect it against internal and external security threats in the most optimal way, you can rest assured that XProtect Essential+ gives you the protection you need.

System Diagram –
Simple system, all in one

Simplest possible design where everything is connected to the same network and all server components and XProtect clients run on the same server/PC.

Recording Server
Management Server
Management Client
Mobile Server
Event Server
SQL Server

XProtect Smart Client

XProtect Web Client

XProtect Mobile

HIGHLIGHTED FEATURES

XProtect Clients
Access your system anytime, anywhere with support for all three XProtect Clients.

Retention
Unlimited retention time means video recordings are always there when you need them.

No Restrictions
No strings attached – no VMS costs associated, no re-registration required, or time limitation applied – just download and get started right away.

Device Support
With support for the widest range of hardware devices, you can connect any camera that fits your needs and budget, including ONVIF-compliant devices.

Device Packs
Access to bi-monthly Device Packs with drivers that help you connect your VMS to other and newer devices.

Third-Party Integration
Integrate and embed third-party applications, such as access control, people counting and video analytics, directly into the software for one unified and easy-to-use system.

Upgrade
For more capacity, capabilities or locations, simply exchange your license for a more advanced XProtect variant.

Expansion
Easily grow and expand your system in terms of adding devices (up to 8) or third-party applications.

Search Tools
Find the needle in the haystack with the ability to search through motion-only recordings or motion only in a selected area.

Export
If something happened, video is often the best witness. You can export the video as still images, video files and in the native database format, ensuring you match the need of the recipient.

Local Languages
The interface is available in 30 different languages, removing potential language barriers.

Password Protection
To ensure that evidence doesn't end up in the wrong hands, you can password protect video files and limit access to authorized users.

HTTPS
Supports HTTPS communication between the recording servers, connected cameras and other security devices.

Encryption
Certificate-based encryption to secure the communication of data (video, audio, metadata) originates in the Recording Server and is retrieved by connected components.
