Smart Managed Switches

XS-S1920-E Series

Ruijie Networks Co., Ltd.

For further information, please visit our website https://www.ruijienetworks.com

Product Overview

Ruijie XS-S1920-E Series Switches are the next-generation cost-effective smart managed Layer 2 switches for commercial real estate, hotels and CCTV. The series is designed for small and medium-sized businesses looking for easy-to-deploy solution.

Ruijie XS-S1920-E Series is part of the Ruijie SME networking products. The series consists of three switches including 24-port Fast Ethernet PoE+ switch, 8- and 24-port Gigabit PoE+ switch models.

These switches can be deployed with plug-and-play out the box. Also they can be fine-tuned with features available from built-in Web-UI. Features including VLAN, Spanning Tree, IGMP Snooping can be configured.

With Ruijie Cloud, fast deployment, centralized monitoring and remote maintenance can be done in much efficient ways.

XS-S1920-26GT2SFP-LP-E

Highlights

- Easy management using Web-UI and Ruijie Cloud
- 24-port 10/100, 8- and 24-port Gigabit models include SFP ports
- PoE+ support on all models
- 24-port with 185W PoE power budget for cost-effectiveness
- 3-Year Warranty Free of Charge

Product Features

Easy Management

Built-in Web Management

Even non-technical users can do easy management for the network through a Web browser and XS-S1920-E's Web-UI.

● SNMP v1/v2c/v3

Switches can be discovered and monitored from NMS system or other SNMP-based network tools.

Network Time Protocol

Enables synchronization of time among time servers and clients, fulfill the need for clock-dependent devices in the network.

Ruijie Cloud

The XS-S1920-E Series fully supports Ruijie Cloud, which is a cloud-based service that help user manage and control devices and networks. It can monitor the network and configure or remote control devices.

High Performance

● IGMP Snooping v1/v2/v3

Instead of flooding traffic to all ports, the switch filters multicast traffic to improve network performance, especially useful for IPTV and CCTV deployment.

VLAN Support and Tagging

Supports IEEE802.1Q VLAN, providing security between device groups.

Jumbo Frame Support

Improves the performance of large data packet transfers, supports frame size up to 9KB.

Connectivity and Resiliency

STP, RSTP and MSTP

Supports IEEE802.1D(STP), IEEE802.1w(RSTP) and IEEE802.1s(MSTP) standards, provides redundant links while preventing network loops.

Rapid Link Detection Protocol(RLDP)

Detect the connectivity of links, and supports the enhanced loop detection function to prevent network faults caused by devices such as Hubs.

SFP Ports for Fiber Connectivity

Provides fiber uplinks on all models. SFP ports are in addition to RJ45 Ethernet ports, providing higher total number of available ports.

IEEE802.3at Power over Ethernet(PoE+)

Provides up to 30Watt per port, which allows support of latest PoE+ capable devices such like high-performance access points and IP cameras, as well as any IEEE802.3af-compliant powered devices.

Energy Efficient Ethernet(EEE)

Compliant with IEEE802.3az standard requirements in order to save energy.

Warranty and Support

3-Year Warranty Free of Charge
